

# PetSitters

By Melissa Bykersma

# What's the problem?

- \* Allows users to sign up to watch dogs or owners to send their dogs to a sitter
- \* Although there are few services that allow this, there is not one well known in Australia.

# Why does it need solving?

- \* The pet business is one of the biggest growing industries in the world, including pet food, grooming, day care and more.
- \* There are a few websites such as this overseas however none are that well known in Australia.
- \* A website like this could be changed to suit a clients needs including making it into a singular businesses website for doggy day care to allow their clients to book their dogs into day care.
- \* A website like this one could become very big in Australia with the ever growing pet industry.

# Struggles

- \* The biggest thing this assignment was time, unfortunately I wasn't able to spend as much time as I wanted on everything.
- \* I would have liked to have spent more time including more third party services like MailGun, Stripe and more.

# Favourite Parts

- \* I enjoyed learning a lot about Rails, coming into this assignment not feeling overly comfortable it was great to be able to play around with some of the 'magic'.
